V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	1-3	YES
	Claims		NO
Inventive step (IS)	Claims	1-3	YES
	Claims		NO
Industrial applicability (IA)	Claims	1-3	YES
	Claims		NO

2. Citations and explanations

Document **DE3936432A1**, which is regarded as the closest prior art, discloses a method for producing a high pressure fuel accumulator comprising a tubular base body, the profile of which is extruded, as per the preamble of claim 1. The subject matter of claim 1 differs therefrom in that **cold working of the high pressure fuel accumulator results in strengthening of the surface.**

The subject matter of claim 1 is thus novel (PCT Article 33(2)).

The present invention can therefore be considered to address the problem of increasing strength.

The prior art does not suggest to a person skilled in the art that the method be carried out as indicated above (PCT Article 33(3)).

Claims 2 and 3 are dependent on claim 1 and therefore likewise meet the PCT requirements for novelty and inventive step.
